VISHNU VIJAYAKUMAR

Website Specialist | WordPress & CMS Management | Frontend Development

Palakkad, India • 9074939871 • vishnuvjn224@gmail.com • Portfolio • LinkedIn

PROFESSIONAL SUMMARY

Website Specialist with 3+ years of experience managing, maintaining, and optimizing WordPress websites for business and client requirements. Skilled in building responsive landing pages, updating website content, customizing themes and templates, and troubleshooting technical issues to keep sites running smoothly. Comfortable working across HTML, CSS, JavaScript, and PHP to support day-to-day website operations, with working knowledge of on-page SEO and website performance optimization. Familiar with monitoring website traffic through Google Analytics, and has basic exposure to hosting, SSL, and DNS configuration during deployments. A strong communicator who collaborates easily with designers, marketing teams, and clients, and is quick to pick up new tools and platforms — including practical use of AI tools to support content and productivity.

SKILLS

CMS & Website Platforms: WordPress (primary, day-to-day), WooCommerce; familiar with Shopify, Squarespace, and Wix (project-based experience)

Frontend Development: HTML5, CSS3, JavaScript, Bootstrap; basic knowledge of React.js and Next.js (from personal/client projects)

Website Management: Website maintenance, content updates, landing page development, responsive design, theme/template customization, cross-browser testing, plugin management

Optimization & Analytics: On-page SEO best practices, website performance optimization; familiar with Google Analytics for monitoring traffic and user behavior

Infrastructure Awareness: Basic exposure to hosting, domain configuration, SSL, and DNS during website deployment/migration

Tools: Figma, Strapi (project-based); Git

AI Tools: Practical use of ChatGPT and Claude for content support, productivity, and workflow assistance

WORK EXPERIENCE

Web Developer | Brandstory *06/2023 – Present*

- Manage and update WordPress websites for Brandstory's corporate site and multiple client projects, handling day-to-day content updates, page edits, and plugin management.
- Build and modify responsive landing pages for marketing campaigns, ensuring consistent layout and brand alignment.
- Customize WordPress themes and templates to meet business and client requirements.
- Perform ongoing website maintenance, including bug fixes and content updates, to keep sites running smoothly.
- Optimize website performance and page loading speed to improve user experience.
- Ensure responsive layouts and consistent functionality across desktop, tablet, and mobile devices.
- Implement on-page SEO best practices where required, supporting content visibility and search performance.
- Collaborate with UI/UX designers, project managers, SEO specialists, and clients to deliver websites aligned with business goals.
- Test websites prior to deployment to catch layout, functionality, and cross-browser issues.
- Support website deployments and migrations, with basic exposure to hosting, SSL, and DNS configuration as needed.

Web Developer | Digimark Agency *10/2022 – 06/2023*

- Developed and maintained multiple client websites using WordPress and custom frontend technologies.
- Built landing pages and updated website content to support client marketing needs.
- Customized WordPress themes and fixed bugs to maintain site stability and appearance.
- Improved responsive layouts across devices and integrated contact forms for lead capture.

- Implemented basic SEO best practices to support client visibility goals.
- Worked directly with client requirements, translating requests into website updates and delivering completed work on schedule.

Junior Software Engineer | Skyewall *08/2021 – 08/2022*

- Created and updated web pages using HTML, CSS, JavaScript, Bootstrap, PHP, and WordPress, with a focus on website development over application/backend work.
- Built responsive website layouts and resolved UI issues to improve usability across devices.
- Implemented client-requested changes and tested websites prior to deployment.
- Collaborated with senior developers to support ongoing website development tasks.

FEATURED PROJECT
